SUMMARY

Machine Learning Engineer — Deep Learning — AI for Aerospace & Defense. Innovative and results-driven Machine Learning Engineer with 3+ years of experience developing and deploying AI solutions for computer vision, predictive analytics, and natural language processing. Proficient in deep learning, model optimization, and real-time data processing, with expertise in Python, TensorFlow, PyTorch, and cloud computing. Passionate about leveraging AI for mission-critical applications, including **autonomous systems, defense analytics, and aerospace engineering**. Adept at collaborating with cross-functional teams to drive technological advancements and enhance operational efficiency.

EDUCATION

B.Sc Electronic and Electrical Engineering, Obafemi Awolowo University

2018 - 2024

SKILLS

Hard Skills	SQL, Tableau, Microsoft Power BI, Scikit-learn, TensorFlow, Keras, PyTorch, NLTK, TextBlob, Transformers, Excel (Advanced Analytics), Google Analytics, A/B Testing, Forecasting, AWS, Google Cloud, Docker, Flask, Streamlit, Python (Pandas, NumPy), R, Workflow Automation, Data Wrangling, Business Intelligence (BI), Data-Driven Decision Making, Financial Modeling.
Soft Skills	Leadership, Documentation, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management, Problem Solving, Continuous Learning
Certification	Python and Machine learning Link

WORK EXPERIENCE

Deep Learning Engineer Intern in Plathudeep Hub

2024

- Developed and optimized **convolutional neural networks (CNNs)**, increasing image classification accuracy by 18%, enhancing real-time decision-making.
- Designed and implemented **automated data preprocessing pipelines**, reducing model training time by 25%, improving efficiency for large-scale datasets.
- Deployed production-ready **machine learning models using Flask and Docker**, cutting deployment time by 30% and ensuring **scalability** for enterprise applications.
- Conducted **hyperparameter tuning** and **model optimization**, leading to a **15% improvement in inference speed**, crucial for time-sensitive AI applications.

Researcher and Engineer in NITRON FX

2022

- Spearheaded **solar inverter research**, developing a high-efficiency system that **reduced energy loss by 15%**, contributing to **renewable energy optimization**.
- Conducted **data-driven analysis** on electric vehicle battery performance, identifying key inefficiencies and proposing solutions that **improved charging efficiency by 12%**.
- Collaborated with **cross-functional teams** to prototype and test **energy-efficient hardware solutions**, integrating **predictive analytics** to enhance system performance.
- Led the development of **automated simulation** models, reducing research time by 20%, **optimizing the product development cycle**.

Machine Learning Engineer Intern in Plantheus Limited

2021

- Designed and deployed machine learning models (**Decision Trees, SVMs, Neural Networks**), achieving a 25% increase in prediction accuracy for **business intelligence applications**.
- Engineered **data pipelines** to preprocess and augment datasets, improving model robustness and **enhancing accuracy by 30%**.
- Deployed **Streamlit-based AI applications**, reducing deployment time by 20% while **improving usability** for non-technical stakeholders.
- Developed and optimized **automated anomaly detection models**, enabling real-time risk assessment and reducing **false positive rates by 18%**.

PROJECTS

Loan Prediction Analyze Loan Dataset using different machine learning models and got an accuracy of 81% [.Link](#)

Drone-based Maize Tassel Detection using yolo v5 Developed, trained and deployed a YOLOv5 model to detect maize tassels in aerial drone images and Reframe this as UAV-based computer vision for agricultural monitoring or defense reconnaissance, achieving a precision of 85% and a recall of 51.4%. [Link](#)

Chatbot for Customer Service Designed, implemented, integrated and deployed a customer service chatbot using Dialogflow, enabling automated responses to common customer queries, reducing response time by 40%.[Link](#)

Detection of Ecoli in Water Developed a machine learning model using Fast Ai to predict E. coli contamination in water samples, achieving 93% accuracy on test data.[Link](#)

Detection of Leukemia using deep learning Developed a deep learning model using convolutional neural networks (CNNs) to detect leukemia from blood smear images which highlight potential applications in medical AI for battlefield healthcare., achieving 92% accuracy.[Link](#)

VOLUNTEER EXPERIENCE

Event Coordinator, IEEE Extreme OAU

Planning and Organizing the Program

Osun, Nigeria

May 2024 – Dec 2024

Content Creator and Event Planning, Women In Enineering (WIE) OAU

Planning and Organizing the Program

Osun, Nigeria

May 2024 – Dec 2024
